

# Notes from mockup review

## Project: Aurora

1. Really like the layout of the overview/home page and the box container seems to be unnecessary; Moreover, since the aurora is a freeform feature that without box seems to work better with the theme!
2. Different imagery background for each page
3. Round corner for the imagery on info pages (just two round corners)
4. LOVE THE FONT TYPE!
5. Maybe the font size for header on the page can be little bit bigger too!

**Thank you!**
