## Project Title: Aurora

I'd like to build this site as multiple pages, rather than a long, single page website. Typical site navigation probably across the left top. I believe there is enough content and photography to build out individual pages.

- **Home Page/Introduction**- images and how does the aurora gets created
- **Ethmology**- where does the word 'aurora' comes from
- **Occurrence**
- **Forms of Aurora**
- **Colors and Wavelengths**
- **Changes with time**
- **Sources**-lists of sources of images and information of aurora
